Battery Replacement

The rechargeable "C" cell batteries are designed to last **3 years**. Follow these instructions when replacing rechargeable batteries.

Tools needed:

Small Phillips Head Screwdriver

- Using a Phillips head screwdriver remove both screws then remove battery compartment cover (A)
- Pull out battery case (B)
- Slide cover off battery case to the rear (negative end), and remove old rechargeable "C" cell batteries, then replace with new batteries (C)
- Replace cover, sliding cover from the rear (negative end) to front.
- Insert battery case with the flat side facing up and negative end first into the top of the saddle
- Replace battery compartment cover and screws

Please recycle your old batteries at your local recycling center

To obtain replacement batteries go to www.guidingmailbox.com or call 888-928-2455 during 8am to 5pm East Coast time
